

**Key Vocabulary**

aerial view	a view from above
factory	where goods are made in large quantities
farm	an area of land used to produce crops or to breed animals and livestock
hill	a naturally raised area of land, which is not as high as a mountain
house	a building designed for people to live in.
human geography	features of land that have been impacted by human activity
map	a drawing of a particular area such as a city, a country or a continent
market	a place where people gather to buy and sell goods
office	a building of rooms where business and work is carried out by office workers
physical geography	natural features of land
river	a large, natural stream of fresh water that flows into the sea or a lake
shop	a building in which goods are sold. For example, supermarkets, clothes shops and toy shops
town	a large group of houses, shops and buildings where people live and work. Towns are larger than villages but smaller than cities
train station	a place on a railway line where trains stop for people to get on and off trains
village	a small group of houses, perhaps with a few shops, that are often in the countryside

**Human Geographical features**

**Physical Geographical features**

**Definitions**

Human and physical features are things that you can see all around you.

**Physical features** like seas, mountains and rivers are **natural**. They would be here even if there were no people around.

**Human features** like houses, roads and bridges are things that have been **built by people**.

Maps can show:

- Just physical features - for example when people want to go walking in the mountains.
- Just human features - for example when people want to find their way around the streets in towns or cities.
- Both human and physical features - for example when people go walking in the countryside.

In the mountains, a map would need to show **all the physical features** so that people don't get lost and they keep safe.
